

Stakeholder Register

ShopEase LK — Trusted Online Grocery & General Commerce Platform

Document type	Version	Date	Prepared by
Stakeholder Register	v1.0	May 2026	BA Intern Candidate

1. Purpose

This Stakeholder Register identifies all individuals, groups, and organizations that have an interest in or influence over the ShopEase LK project. It documents each stakeholder's role, interest, influence level, and key requirements. This document is used to guide stakeholder communication and ensure requirements are captured from all relevant parties.

2. Stakeholder Classification Matrix

Stakeholder	Interest level	Influence level	Strategy
CEO / Product Owner	High	High	Manage closely — keep informed at every milestone
IT Manager	High	High	Manage closely — involve in technical decisions
Marketing Manager	High	Medium	Keep satisfied — regular feature briefings
Customer Service Lead	Medium	Medium	Keep informed — consult on returns and complaints
End Customer (Shopper)	High	Low	Monitor — gather feedback via surveys and reviews
Seller / Vendor	High	Medium	Keep satisfied — seller onboarding support
PickMe / Uber (partner)	Medium	High	Manage closely — API agreement critical to delivery
Pickup point partners	Low	Medium	Keep informed — commercial agreements required

3. Detailed Stakeholder Profiles

3.1 CEO / Product Owner

Attribute	Detail
Organization role	Founder and CEO of ShopEase LK
Project role	Project sponsor and primary decision-maker
Key concerns	Revenue growth, brand reputation, return on investment, time-to-market
Requirements	Platform must launch within 6 months; seller onboarding must be simple; dashboard showing revenue and order volume
Communication	Weekly status report; milestone sign-off meetings

3.2 IT Manager

Attribute	Detail
Organization role	Head of Technology, responsible for platform development and infrastructure
Project role	Technical lead; approves architecture and integration decisions
Key concerns	System security, scalability, API reliability (PickMe/Uber), uptime SLA
Requirements	Clear API specifications for PickMe/Uber integration; system must handle 1,000 concurrent users at launch; SSL and data encryption mandatory
Communication	Daily stand-up during development; technical review at each sprint

3.3 Marketing Manager

Attribute	Detail
Organization role	Head of Marketing and Customer Acquisition
Project role	Defines promotional features; approves customer-facing content requirements
Key concerns	Customer acquisition, promo code management, campaign analytics, brand consistency
Requirements	Promo/discount code engine; banner management via admin panel; email marketing integration; new user referral system
Communication	Bi-weekly feature review; pre-launch marketing brief

3.4 Customer Service Lead

Attribute	Detail
Organization role	Head of Customer Experience and After-sales Support
Project role	Defines support workflows, return/refund policies, and complaint handling
Key concerns	Order complaint resolution, returns process, delivery dispute management

Requirements	Order status visible to support team; return request workflow; dispute escalation to admin; automated order update notifications
Communication	Monthly operational review; consulted on any return/refund policy change

3.5 End Customer (Shopper)

Attribute	Detail
Segments	Busy professionals; quality-conscious buyers; price-sensitive households; rural/outstation customers
Key concerns	Product quality assurance, delivery reliability, low cost, trust, easy returns
Requirements	Clear product images and reviews; multiple delivery options with cost shown upfront; COD availability; real-time order tracking; simple return process
Communication	Post-purchase satisfaction survey; in-app notifications; email updates

3.6 Seller / Vendor

Attribute	Detail
Profile	Small-to-medium retailers, individual vendors, local producers across Sri Lanka
Key concerns	Easy listing, fair commission structure, fast payment settlement, visibility on platform
Requirements	Simple seller dashboard; inventory management; sales analytics; clear commission schedule; bank transfer settlement within 7 days
Communication	Seller newsletter; onboarding email sequence; monthly performance report

3.7 PickMe / Uber (Delivery Partner)

Attribute	Detail
Role	Third-party courier API partner for urgent same-day delivery in urban areas
Key concerns	API usage volume, transaction commission, SLA compliance, data sharing agreement
Requirements	API integration to fetch real-time driver availability, ETA and price quote; webhook for delivery status updates; coverage zone data feed
Communication	API partner agreement; monthly usage review; incident escalation protocol
