

Business Requirements Document

ShopEase LK — Trusted Online Grocery & General Commerce Platform

Document type	Version	Date	Prepared by
BRD	v1.0	May 2026	R.M.T.D.Rathnayake

1. Introduction

1.1 Document Purpose

This Business Requirements Document (BRD) captures the business needs, objectives, and high-level requirements for the ShopEase LK platform. It serves as the primary agreement between business stakeholders and the project team, and forms the basis for the System Requirements Specification (SRS) and subsequent design and development work.

1.2 Project Background

ShopEase LK is a startup e-commerce initiative targeting the Sri Lankan market. A contextual analysis of consumer behavior in Sri Lanka revealed that e-commerce adoption remains significantly lower than regional peers, despite adequate internet infrastructure. The root causes identified through stakeholder research are: (1) lack of trust in online product quality, (2) high and unreliable delivery costs, and (3) absence of cash payment options that accommodate non-card users.

1.3 Project Vision

To become Sri Lanka's most trusted online shopping platform .where consumers can buy any general product or grocery with confidence in quality, at a fair price, delivered reliably to their door or a nearby pickup point.

2. Business Objectives

ID	Business objective	Success measure
BO-01	Enable online purchase of groceries and general goods 24/7	Platform live with 100+ listings
BO-02	Build consumer trust through verified seller and quality systems	CSAT score >= 4.0/5.0
BO-03	Reduce delivery cost barrier via pickup points and bulk routes	Pickup delivery cost <= Rs 100
BO-04	Provide urgent delivery via PickMe/Uber API for urban customers	Same-day delivery in Colombo at launch
BO-05	Support cash-on-delivery to include non-card-holding customers	COD on all 3 delivery methods

BO-06	Provide sellers with tools to manage listings, inventory, and sales	Seller dashboard operational at launch
-------	---	--

3. Business Requirements

3.1 User Management

ID	Requirement	Priority	Source
BR-UM-01	The system shall allow customers to register using email or mobile number.	Must	CEO, End Customer
BR-UM-02	Customers shall be able to save multiple delivery addresses.	Must	End Customer
BR-UM-03	Sellers shall register separately and undergo admin verification before listing products.	Must	CEO, Seller
BR-UM-04	Verified sellers shall display a trust badge on their storefront and product pages.	Must	End Customer, Marketing

3.2 Product Catalog

ID	Requirement	Priority	Source
BR-PC-01	Sellers shall upload product listings with minimum 3 photos, price, stock count, and description.	Must	Seller, End Customer
BR-PC-02	Customers shall filter products by category, price range, seller rating, and in-stock status.	Must	End Customer
BR-PC-03	Customers shall post text, photo, and video reviews after a confirmed purchase.	Should	End Customer, Marketing
BR-PC-04	The system shall display an average product quality rating visible on product and search pages.	Must	End Customer

3.3 Delivery System

ID	Requirement	Priority	Source
----	-------------	----------	--------

BR-DL-01	The system shall present delivery options based on: urgency selection, customer location, and order value.	Must	CEO, IT Manager
BR-DL-02	If 'Urgent' is selected and customer is in coverage area, PickMe and Uber options shall be shown with real-time ETA and price from their API.	Must	CEO, IT Manager
BR-DL-03	If 'Urgent' is selected but customer is outside courier coverage, only ShopEase delivery and pickup points shall be shown with an explanatory message.	Must	IT Manager
BR-DL-04	Standard ShopEase delivery shall be free for orders exceeding Rs 3,000; otherwise a delivery fee applies.	Must	CEO, Marketing
BR-DL-05	Pickup point option shall be displayed to all customers regardless of urgency or order value.	Must	CEO, End Customer
BR-DL-06	Cash-on-delivery shall be available as a payment method for all three delivery types.	Must	End Customer, CS Lead
BR-DL-07	Customer shall receive real-time SMS and email notifications at each delivery stage.	Must	End Customer, CS Lead

3.4 Payment

ID	Requirement	Priority	Source
BR-PM-01	System shall support card payments (Visa, Mastercard) processed in LKR via a local payment gateway.	Must	CEO, IT Manager
BR-PM-02	System shall support cash-on-delivery with confirmation workflow for the assigned driver or pickup agent.	Must	End Customer
BR-PM-03	Promo codes and discount vouchers shall be applicable at checkout.	Should	Marketing Manager
BR-PM-04	Sellers shall receive payment settlement within 7 business days of delivery confirmation.	Must	Seller

3.5 Admin & Governance

ID	Requirement	Priority	Source
----	-------------	----------	--------

BR-AD-01	Admin shall review and approve or reject seller registration applications.	Must	CEO
BR-AD-02	Admin shall have visibility of all orders, seller performance, and platform revenue via a dashboard.	Must	CEO
BR-AD-03	Admin shall be able to resolve disputes between customers and sellers and issue refunds.	Must	CS Lead
BR-AD-04	Admin shall manage pickup point partner locations, including activation and deactivation.	Must	CEO, IT Manager

4. Non-Functional Requirements (Business Level)

Category	Requirement	Target
Performance	Platform shall load product pages within acceptable response time under normal load	Under 3 seconds
Availability	Platform shall be available during core shopping hours with minimal downtime	99% uptime
Security	All customer data and payment information shall be encrypted in transit and at rest	SSL + AES-256
Scalability	System shall handle concurrent users at launch without degradation	1,000+ users
Compliance	Platform must comply with Sri Lanka consumer protection and data regulations	Full compliance

5. MoSCoW Prioritization Summary

Priority	Features
Must have	User registration, product catalog, seller verification, shopping cart, checkout, card payment, COD, PickMe/Uber integration, ShopEase delivery, pickup points, order tracking, admin panel
Should have	Photo/video product reviews, promo code engine, seller analytics dashboard, email marketing integration, return request workflow

Could have	Referral system, wishlist, product comparison, bulk-buy group orders, seller chat
Won't have (Phase 1)	Mobile app, AI recommendations, multi-language support, subscription grocery basket, auction/bidding

6. Assumptions & Dependencies

6.1 Assumptions

- PickMe and/or Uber will agree to an API integration partnership for delivery services.
- A minimum of 10 pickup point partners (pharmacies, superettes) will be contracted before launch
- A third-party LKR-compatible payment gateway will be procured for card processing.
- Sellers will self-register; initial manual verification by admin team is acceptable for MVP.
- Customers have basic internet access and a valid contact method (email or phone).

6.2 Dependencies

- PickMe/Uber API agreement must be signed by Month 2 for integration work to begin.
- Payment gateway provider must be contracted by Month 1.
- Pickup point partner agreements must be finalized before UAT begins.
- Seller onboarding campaign must begin 4 weeks before go-live to ensure 100+ listings at launch

7. Approval & Sign-off
